Summary

Highly motivated and results-oriented software developer with proven experience in designing, developing, and deploying full-stack applications. Proficient in Python, C++, JavaScript, and various cloud technologies, seeking a challenging DevOps Engineer role at Gamry Instruments where I can leverage my skills to improve software development processes and contribute to the company's growth. Experienced with agile methodologies and passionate about automation.

Projects

E-commerce Platform

Technologies: React, Node.js, PostgreSQL, Stripe API

Developed a full-stack e-commerce website featuring user authentication, product browsing, shopping cart functionality, and secure payment processing via Stripe. This project demonstrates proficiency in full-stack development and API integration, relevant to building and managing complex software systems.

AI Chatbot

Technologies: Python, OpenAI API

Developed an AI-powered chatbot using Python and the OpenAI API to automate customer support inquiries. This project showcases experience with AI/ML technologies and Python development, valuable for automating tasks and improving user experience.

Education

[Degree Title] – [University Name] (*Graduation Year*) (*Replace with Emily's information*) Relevant Courses: Data Structures, Web Development, AI & Machine Learning
